The instructions in this Quick Start Guide are for first-time setup only. Please do not use this procedure when RAID has already been initialized.

## 1. Mount drives in drive trays.

- a. Mount the drive at the very end of the tray.

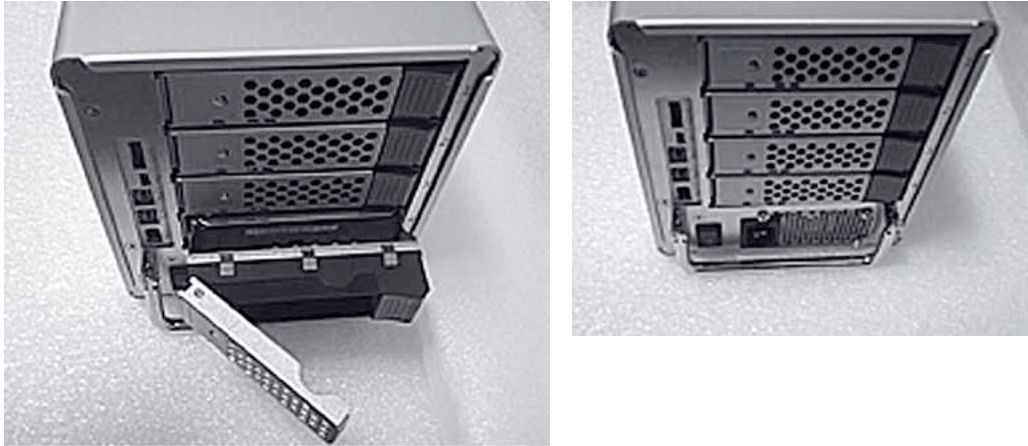

- b. Leave a gap at the front.

- c. Use the following screw holes to mount the drive.

2. **Insert the drive trays into the unit.**

3. **Connect the power cord.**

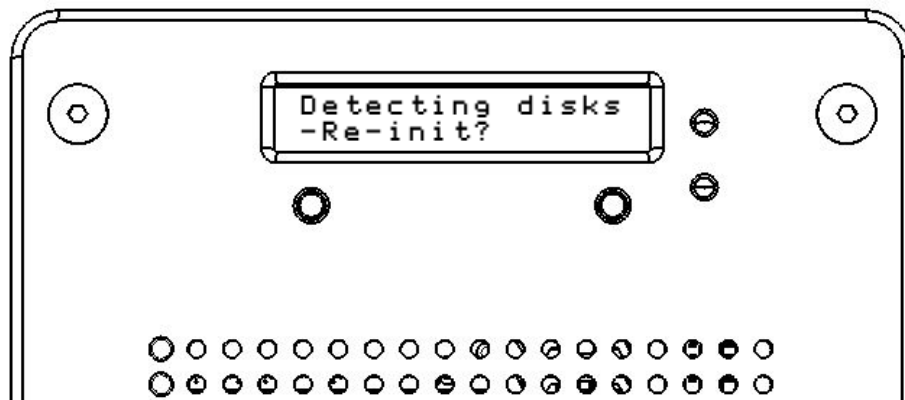

4. **Connect one of the data cables from the host to the unit.  
(USB, Firewire 400, Firewire 800, or eSATA)**

5. Power on the unit via the switch in the rear of the unit.

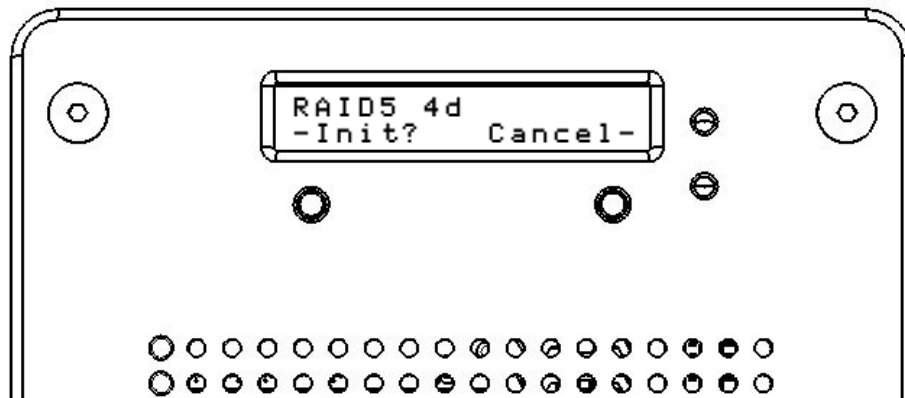

6. Select “-Re-init?” by pressing the left ◀ SET button.

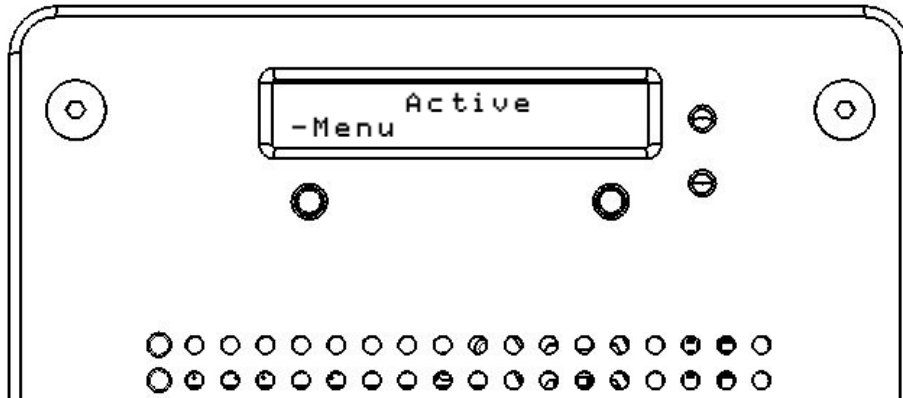

7. Wait for a few seconds, and then select “-Init?” by pressing the left ◀ SET button again.

Warning: This will erase any data on the disks.

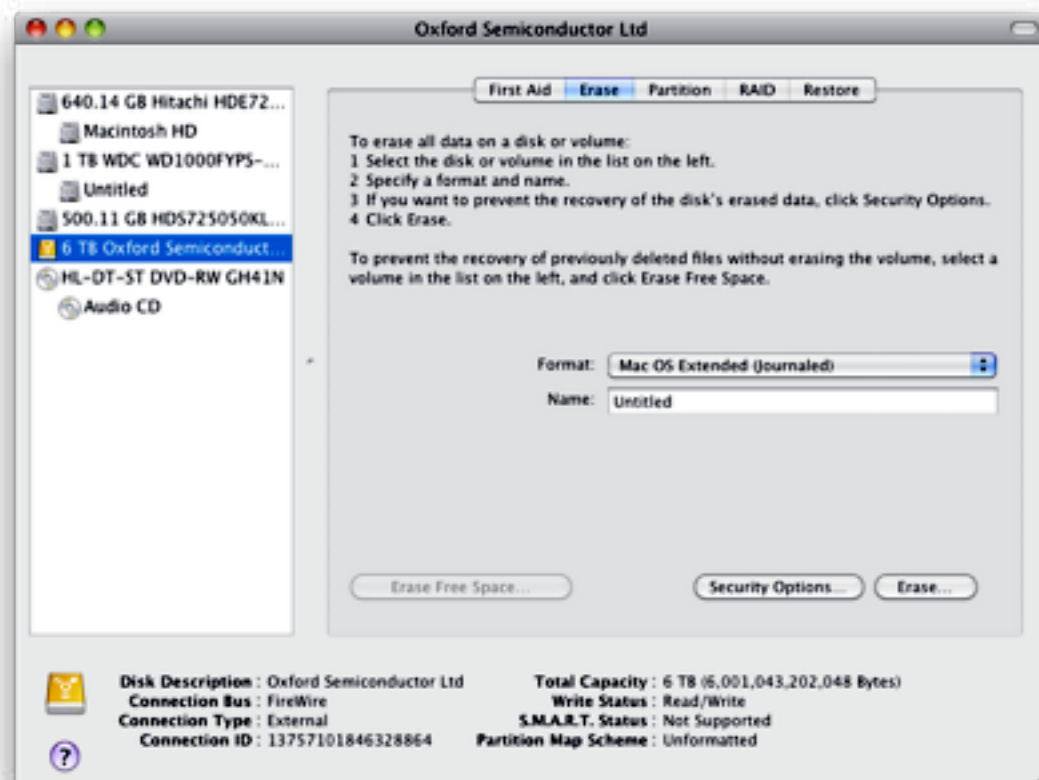

8. Wait a few more seconds for the initialization to complete.

9. On the Mac host, start Disk Utility.

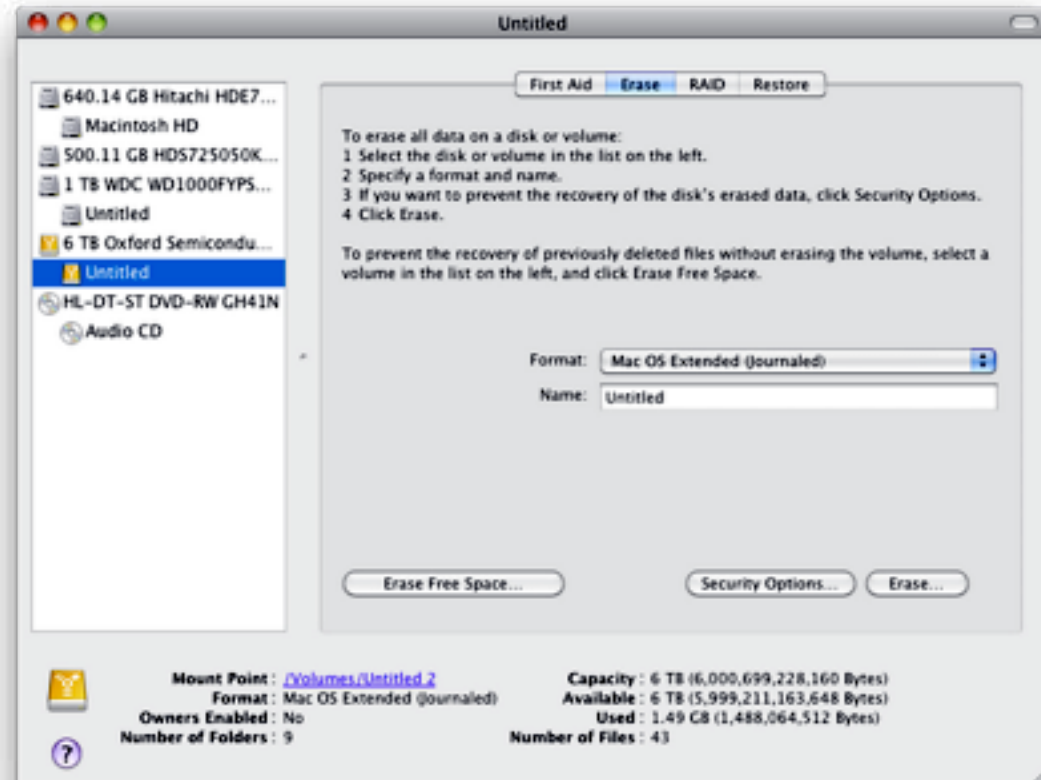

10. Select the device on the left.  
Select the “Erase” tab, then click on “Erase.”

## 11. Confirm by selecting “Erase.”

## 12. The volume should now be formatted and mounted.

## 13. There should now be an icon on the desktop for the new volume.
